

Day of Week(---RETIRED---)

Grade settings: Maximum grade: 100

Disable external file upload, paste and drop external content: Yes

Based on: [Day of Week\(---RETIRED---\)](#)

Run: Yes **Evaluate:** Yes

Automatic grade: Yes

Day of Week Write a program to read a string containing date in DD/MM/YYYY format and prints the day of the week that date falls on.

Return the day in lowercase letter (Ex: monday) Include a class UserMainCode with a static method getDayOfWeek which accepts the string.

The return type is the string.

Create a Class Main which would be used to accept the string and call the static method present in UserMainCode.

Input and Output Format:

Input consists of a string.

Output consists of a string.

Refer sample output for formatting specifications.

Sample Input 1:

02/04/1985

Sample Output 1:

tuesday
