

Month Name(---RETIRED---)

Grade settings: Maximum grade: 100

Disable external file upload, paste and drop external content: Yes

Based on: [Month Name\(---RETIRED---\)](#)

Run: Yes **Evaluate:** Yes

Automatic grade: Yes

Given a date as a string input in the format dd-mm-yy, write a program to extract the month and to print the month name in upper case.

Include a class **UserMainCode** with a static method "**getMonthName**" that accepts a String argument and returns a String that corresponds to the month name.

Create a class **Main** which would get the String as input and call the static method **getMonthName** present in the UserMainCode.

The month names are {JANUARY, FEBRUARY, MARCH, APRIL, MAY, JUNE, JULY, AUGUST, SEPTEMBER, OCTOBER, NOVEMBER, DECEMBER}

Input and Output Format:

Input consists of a String.

Output consists of a String.

Sample Input:

01-06-82

Sample Output:

JUNE
