Given three integers (a,b,c) find the sum. However, if one of the values is the same as another, both the numbers do not count towards the sum and the third number is returned as the sum.

Include a class UserMainCode with a static method **getDistinctSum** which accepts three integers and returns integer.

Create a Class Main which would be used to accept three integers and call the static method present in UserMainCode.

Input and Output Format:

Input consists of three integers.

Output consists of a integer.

Refer sample output for formatting specifications.
